### **Cleanability Guidance for Allante FRee®**

Thank you for your inquiry regarding the cleanability of our Allante FRee® product. Before sharing a list of compatible products, it's important to note some distinctions: while the expression "bleach cleanable" is often used, bleach is a disinfectant, not a general-purpose cleaner. Not all bleach or disinfectant formulations are created equal, and their effects on materials can vary significantly.

To help you select suitable products, we have compiled a list of approved cleaners and disinfectants tested for compatibility with Allante FRee®. Among these, certain bleach-based products are safe to use. Specifically, Allante FRee® is compatible with a 9:1 water-to-bleach solution, which provides effective disinfection while maintaining the material's quality and durability.

Adhering to the recommended dilution guidelines is essential to preserving the appearance and integrity of Allante FRee®. Applying undiluted bleach or using incorrect ratios can cause damage or discoloration to the material and may not achieve the level of disinfection required.

If you have any further questions or need additional information, please do not hesitate to contact us. We are here to support you in making the best decisions for your needs.

Thank you for considering Morbern and our Allante FRee® product. We appreciate the opportunity to work with you and look forward to continuing our partnership.

**Jean Claude Chabot**

Vice-President, New product development and Process improvement
