

EvoHide™ Oasis

The first sustainable, coated fabric made from bio-based raw materials.

Its 100%, post-consumer-grade recycled polyester fabric backing is made from used plastic water bottles.

For every 100,000 yards of Evohide™ Oasis manufactured, 1,200,000 PET bottles are eliminated from the environment or diverted from landfill sites.

Oasis' wavy, textile-inspired grain is available in 24 colors. It is Phthalate-free and REACH compliant. Produced without chemical FR additives, it meets Cal TB 117-2013 regulations.

Specifications

- Finished Width: 54 inches.
- Roll Size: 30 linear yards.
- Standard Weight: 30+/-4 oz per linear yard.
- Thickness: 42+/-4 mils.
- Cold Crack: -25° F.
- 1000 Hours WeatherOmeter Resistance.
- Abrasion resistance: No Significant wear after 30,000 cycles with #10 cotton duck using the Wyzenbeek test method.
- EN 1021-1 and 2.
- Cal TB 117-2013 (Section 1-Cover Fabric).
