

Freeway

A high-performance coated fabric designed for commercial, transportation and safety vehicle upholstery.

Built to Handle the Traffic

Vehicles, including ambulances, firetrucks and medevacs, rely on this sturdy vinyl that handles heavy traffic and extreme weather. Freeway delivers considerable performance with a light hand, weighing only 35 ounces. It meets the flame resistance requirements of FMVSS-302, and can handle repeated use — withstanding 100,000 double rubs (Wyzenbeek method). It's designed to weather the harshest of winter temperatures with a cold crack rating of -25 degrees and is formulated free of anti-microbial additives and phthalates. Stains that often come from a life on the road are cleaned up easily with soap and water. Available in 21 colorways. While built for emergency needs, Freeway is equally adept at upholstery applications in office, educational and hospitality settings.

Specifications

- Abrasion resistance: No Significant wear after 100,000 double rubs with #10 cotton duck using the Wyzenbeek test method, CFFA-1a.
- Formulated with Flame Retardant additive. Title 49 CFR, Chapter V Section 571.302 (FMVSS 302).
- Weather Resistant, and Cold Resistant (-25 °F).
