

FReedom

Digital Print base additive-free.

FReedom is an FR-free, MR-free, and phthalate-free digital print base vinyl fabric designed to support both performance and sustainability in today's contract markets. Its additive-free construction promotes healthier indoor spaces while providing a dependable foundation for high-quality digital printing.

Even without added flame retardants, FReedom meets key flammability standards —CA TB 117-2013, NFPA 260, and UFAC Class 1—delivering the safety and compliance required across hospitality, healthcare, workplace, and other contract environments.

Durable, versatile, and print-ready, Freedom offers a balanced solution that combines compliance, design flexibility, and long-lasting performance.

Specifications

- Finished Width: 54 inches
- Weight: 32 +/- 2 oz per linear yard
- Thickness: 38 +/- 4 mils
- Abrasion resistance: No significant wear after 500,000 double rubs with #10 cottonduck using the Wyzenbeek test method
- Cold Crack -25° F
- 150 UV Hours
- Cal TB 117-2013
- CA AB2998 Compliant
- NFPA260, UFAC Class 1
