

(n)Motion!

Digital Print base for Mass Transit application.

(n)Motion! is purpose-built for the rigorous demands of the mass transit industry, delivering safety, durability, and long-term performance. Engineered to meet strict regulatory expectations, it successfully passes Ultra Low Smoke (ULS) and Toxic Gas Generation tests, helping support safer passenger environments in buses, rail systems, and other public transportation settings.

Designed for continuous, heavy-use applications, (n)Motion! offers exceptional abrasion resistance, ensuring it stands up to daily wear in high-traffic seating and interior surfaces. Its robust construction provides lasting reliability, making it an ideal solution for transit manufacturers, refurbishers, and operators who need materials that perform under pressure.

Specifications

- Finished Width: 54 inches
- Weight: 36 +/- 3 oz per linear yard
- Thickness: 35 +/- 3 mils
- Abrasion resistance: No significant wear after 100,000 double rubs with #10 cottonduck using the Wyzenbeek test method
- Cold Crack -25° F
- Fire resistance: Title 49, Title 14, Docket 90A, ASTM 6413
- FMVSS302 Compliant
