

MorCare®

Engineered for versatility,
tailorability and luxury.

MorCare® is designed to handle the highest demands for hospitals, contract, and institutional use. With enhanced resistance to harsh chemicals used in those environments, MorCare® will resist the repeated actions of normal dilutions of chlorine bleaches and quaternary ammonia salt-based cleaners without serious discoloration. MorCare® protection has incredible durability by maintaining its new appearance even after heavy-duty use. MorCare® products are formulated free of flame retardants.

As the healthcare category continues to evolve—especially with the rapid growth of assisted living—designers are being challenged to deliver more than just performance. These spaces demand the same level of durability, cleanability, and antimicrobial protection as traditional healthcare environments, while also offering the warmth and aesthetic appeal of hospitality design.

Morbern rises to meet this challenge with a wide range of patterns, textures, and colors that seamlessly blend function with style. Our non-porous vinyls are specifically engineered for environments where bodily and non-bodily fluids are a daily reality.

The result? Surfaces that resist absorption, are easy to clean, and support stringent infection control standards—without compromising on design.

From high-traffic corridors to intimate patient rooms, Morbern helps designers create beautiful, resilient spaces that support health, safety, and comfort.

Specifications

- Width: 54 inches. Roll Size: 40 yards.
- Weight: 32.25 +/- 2 oz per linear yard.
- Thickness: 40 ± 4 mils.
- Abrasion Resistance: No significant wear after 500,000 double rubs with #8 cotton duck using the Wyzenbeek test method.
