

Allante FRee®

Part of the MorGreen™
program.

Influencers in the contract market began asking for less additives in products, including their choice of upholstery material, so Morbern created Allante FRee®, an environmentally friendly, luxury hand, leather-like vinyl. Allante FRee® is void of flame retardants, anti-microbial resistant additives and ortho-phthalates. Yet it still meets all of the requirements for contract interiors including CAL TB 117-2013, NFPA 260, AB2998 and UFAC Class 1. And performance is still a main attribute. Allante FRee® has enhanced denim dye resistance, advanced cleanability, and resistance to oils (from cosmetics, cooking oils and fatty foods). It's available in a range of 25 solid colorways from neutrals to saturated reds, greens and blues.

Specifications

- Abrasion resistance: NoSignificant wear after 250,000 double rubs with #10 cotton duck using the Wyzenbeek test method.
- CleanFRee top finish with Denim Dye Resistance, Oil Resistance, and Cleanability.
- Flame retardant additive free
