

Sarasota

Built to Perform. Styled to Impress.

Sarasota isn't here to compete, it's here to complete. Designed to pair effortlessly with Bayside, Mink Sandpiper and Voyager, it adds tonal depth and textural clarity that elevate every detail.

Sporty yet sophisticated, Sarasota brings a tailored, premium finish to marine seating, creating visual energy without overpowering the overall design.

Built with Splash's pink-stain-resistant vinyl formulation, the gold standard in the marine industry, Sarasota combines lasting performance with elevated style. Its four-way stretch follows complex curves for seamless installation, even in demanding marine environments.

The result is a refined accent material that keeps every detail looking sharp and performing exactly as it should.

Key Specifications and Product Features

Content and Backing	Vinyl / 100% knitted polyester
Width	54 inches
Roll size	40 linear yards
Weight	33 ± 2 oz. per linear yard
Weather Resistance	650 Hours QUV
Mildew Resistance	ASTM G21
Pink Stain Resistance	ASTM E1428
Abrasion Resistance	250,000 double rubs; no significant wear using #10 cotton duck, Wyzenbeek test method
Cold Crack Resistance	-25°F
Flame Resistance	CAL TB 117-2013, FMVSS 302, NFPA 260, UFAC Class 1 and IMO MSC 88/26/ADD. 2, Part 8 (3.1 and 3.2). Must be used with suitable components.
Additional Features	Four-way stretch; non-directional grain; five-year limited product warranty
Cleanability	See Morbern's approved Marine Cleaners list on the website

Certification and Standards

+ USMCA compliant

Coordinating Splash Patterns

+ Bayside
+ Mink
+ Sandpiper
+ Voyager

Built to Perform for Outdoor Environments

+ UV, mildew, pink-stain and cold-crack resistant with proven durability for demanding marine environments.
+ Approved for exterior and interior applications.

Sarasota is constructed on Morbern's proven Splash construction, bringing exceptional four-way stretch, tailorability and marine-grade durability to its refined aesthetic. All performance characteristics, testing standards and applicable certifications reflect the underlying Splash construction.
